THE CANAL QUISTION—HIGHLY INTERESTING DEBATE.

Mr. Cooley's resolutions in regard to joint committee on the eulargement of the canals were called up.

Mr. LOORS, (dem.) of Herkimer, said the question was cas of great importance, and should be acted upon deliberately. Much mischief resulted from hasty legislation. The Logislature is divided into two branches, each acting upon its own responsibility. These principles were founded in wisdom ander consideration programs and consideration programs. The other than the stocks which were to be created by the standing committees of the House—those on Ways and Means, Canals, and on the Banks. It touched the drities of the latter committee, because there was a proposition that the stocks which were to be created by the enlargement, were to be used as the basis of banking institutions. Rumor has told us that the mover of these resolutions has in view the borrewing of ten millions of dollars by the State to be exhausted in the enlargement of the Eric Canal, and that this sum was to be paid in eighteen years, by a direct tax on the people. This would occasion an annual tax of three quarters of a million. Such a plan would meet with none from the House. The proper standing committees of this House should first have time to look into the condition of our finances—to consider the meeds of the State—to devise means for supplying these meeds. It is said in favor of these resolutions that they contemplate a measure not recommended by the Governor's measage, and are not therefore within the province of high tolls, instead of such a resturction as would greatly increase the business of the canals owed their origin and progress to the democratic party. He did not deny that the opposition. Instead of amounting, as formerly, to supply that railr seeds of the Sinest-co-devier sensas for supplying the seeds. It is said in favor of these resolutions that they read a seed of the Sinest seeds of the Sinest seeds of the Sinest seeds. It is said in favor of these resolutions that they read a series of the committees among whom the suggestions of that it is the seed of the committee of the committees among whom the suggestions of that it is the seed of the committee of the committees among whom the suggestions of that it is the seed of the committee of the committee of the committees among whom the suggestions of that it is the seed of the committee of the canals. But the canals over the foreign and proper the business of the canals. The surplus revenues high condition. Instead of amounting, as fremerly behave the business of the canals. The surplus revenues the business of the canals. The surplus revenues the business done on militroads which formerly behave the committee of the surplus of the committee of the committee of the surplus of the committee of the committee of the surplus of the committee of the committee of the surplus of the committee of the committee of the surplus of the committee of the committee of the committee of the surplus of the committee of the committe

Possess.
Mr. O'Brien, (dem.) of Kings, thought gentlemen were

favor of an enlargement of the canal in a way that honest judgement would appropriate money which it did not possess.

Mr. O'Berex, (dem.) of Kings, thought gentlemen were mistaken in supposing the proposition would land the question beyond the reach of the House. The joint committee could enforce no measure against the consent of this House. He thought if there were any particular projects at the foundation of this measure, it would be best to have a committee to meet that from the Senate, and see what ulterior views governed the proposition. As to this "ten million tremor," it was merely rumor, and need have no influence over the House now. He hoped the joint committee would be formed.

Mr. Hasmag, (whig) of Monroe, would say only a few words, and that for the purpose of inducing a better understanding of the measure under considerations which would render it proper for the friends of the canal to go for the committee. There had been sufficient reasons given for appointing the joint committee. He trusted there were gentlemen whose minds were not yet shut against good causes. He was glad the intention of making the enlargement of the canals a party question had seen so emphatically disclaimed. He wished both paries to unite cordially it devising proper measures to secure the enlargement. He believed he should concurst the majority in many of their financial measures. He was a friend of economy and of the sonstitution. The reference of matters of legislation to a joint committee was not of unusual scourrence. There are many precedents for it. It is an of the state of the canal measures of the State. Even the gentleman from the usual committee, why should he canal measures of the State. Even the gentleman from the issue of the State to unite with them in a committee of the canal enlargement, which would meet with the propose of the state to unite with them in the propose of the state to unite with them in the propose of the state of the canal committee has of the propose of the state of the propose of the state

mice are increasing and there is danger in delay. The en-largement would reduce tolks and retain for the canals their business. We look to them for future revenues to support the expenses of the State. Mr. H., before concluding, gave way to a motion, by Mr. Sgaw, to adjourn, which was carried.

Tammany Hall—A Grand Explosion—" Wars and Rumors of Wars"—A New Tammany Hall in Prospect.

Last evening the Sachems assembled at Tammany Hall,

Last evening the Sachems assembled at Tammany Hall, in pursuance of the call in yesterday's Huzald, for the purpose of deciding between the hard shells and the soft shells, in reference to the organization of the General Committee. The sachems consist of thirteen members—eleven are baruburners, and only two are hunkers. This shows the activity of the barnburners, for there is no doubt that a majority of the Tammany Society are hunkers; but they never took the pains to elect men of their own principles, not deeming it of any importance; so much so, that this council holds over for two years, there being no election last year. It will probably be different being no election last year. It will probably be different

answer, or to acknowledge the authority of the sachems to interfere with the primary elections of the people, and denounced it as an act of tyranny. The sachems then named, by resolution, the General Committee, and called them together for this evening, thus deciding upon the contested seats. They arrived at this conclusion partly by taking a majority of the inspectors, and partly by de-claring members elected without credentials or otherwise,

Great excitement prevailed in the council, two mem-bers—namely, ex-Mayor Mickle and Joseph Cornell—protesting against the action of the majority. The members of the Tammany Society, who are allowed to be present, but not to speak, partook in the excitement, and one of them—Cornelius Bogardus, a great practical joker—handed around to the "grave and reverend seigniors" of the council two kinds of nuts, one being a soft shell and the other hickory, asking in a low tone which they would have, which excited great mirth and merriment.

When the name of Alderman Barr, who is a member of

When the name of Alderman Barr, who is a member of the Tammany Society, and was therefore present, was called as Chairman of the hard-shell General Committee, be handed in the following PROTEST.

TO THE COUNCIL OF TANMANY SOCIETY OR COLUMBIAN OR-

To the Council of Tannani Society of the Council of

that then the council of the Society shall be convened, and determine whether or no the use of the Hall may be granted, which decision is final between the landlord and tenant.

It is well known that every instance in which the council has been called upon to decide who shall meet in Tammany Hall for political purposes, has arisen out of this stipulation in the lease to Mr. Howard, or a similar clause in prior leases to other parties. Such was the case of the party called "conservatives," who were prohibited from holding a public meeting in Tammany Hall in 1837, because their "general political character" differed from the "general political character" differed from the general political character of the Democratic Republican General Committee; that is to say, they opposed the then existing democratic national administration, and processed different views in regard to the main political questions which were then agitated.

But it has often happened that rival committees, both representing or claiming to have been elected to represent the democratic republican party in the city, have met in Tammeny Hell without objection, and even in defance of objections, no matter from what quarter; and this, too, without hindrance from, if not by the express permission of the Council. Such, for instance, were the committees of which Michael Ulshoeffer and Gideon Lee were chairmen; such also were the committees of which Henry M. Western, and Fernando Wood were chairmen. The respective chaims to regularity of these bodies, were never demend fit and proper matters to be decided by the Council, nor were they ever so decided.

When the free soil party was organized in 1848, for the purpose of defeating Gen. Cuss, the democracy were never demend for the proper to the committee and the Baltimor pialorn, while the other suported Van Euren and Leading demend Committee and the Baltimor pialorn, while the other supported Van Euren and Leading demend Committee and the Baltimor pialorn, while the other supported Van Euren and Committee to

mittee is impogated.
It seems, however, by the resolution of the Council, that it claims the right of deciding what persons shall constitute the General Committees for the year 1853. That is a matter which the Society has no right to decide. It has near the fore metables to decide the second transfer of the second trans has never before undertaken to determine such a contro yersy, and this pretence of authority, having no prece-dent or foundation, is likely to be attended with coarse

quences the most disastrous to the harmony and ascendency of the democratic party in this city and State.

The General Committee, like all other deliberative bodies, is the sole judge of the qualifications of its members. The Council of Tammany Society cannot successfully usurp that preregative. The General Committee derives its powers from the people, who alone can take them away.

The Committee in its objects, its organization, its mode of action, and in its responsibilities to a popular constituency, is wholly distinct from, and independent of, Tammany Society, its council or officers, and, to be efficient for any good purpose, so it must always remain, leaving to the Society its legitimate duty of excluding from Tammany Hall those only who are hostile to the democracy and their principles. THOMAS J. BARR,
Chairman Dem. Rep. Gen. Com.

The protest was read, received, and ordered on file, but

the majority of the Council disregarded it.
In the bar-room of Tammany Hall there were a number of fighting men, and also many of the heads of the demo cratic party. When the announcement of the decision of the sachems came down, there was much excitement and the sum of fifteen thousand dollars was subscribed on the spot, for the purpose of building a new Tammany

Bark Eferrana, ashore on Squan beach, is insured in Boston for \$12,000.

Bark Kedar, Fessenden, from Boston for California, before reported put into Rio Janeiro leaky, had discharged the whole of her cargo 4th ult, in good order. Capt Fessenden writes that the leak was in the bottom, but they had not discovered the place. It was supposed to be from a treenail or spike hole.

Bark Fourst Planck (of Boston), wrecked on the SW side of Nantucket, was sold at auction 17th inst, for \$245. The balance of the cargo was sold at the same time for \$43.

Brig Agenoria—The sails, rigging, and other materials of this vessel, wrecked on Long Island some time since, were landed upon the beach, and are waiting an opportunity for shipment to Gloucester. Some hinds of sugar, saved from her, are also upon the beach, covered with sails.

Schr Eliza, from NBedford, supplying lighthouses, which was a-hore on French reef, thumped very heavily at times, and would not have been saved but by the assistance of wreckers. The Court held in this case, as in the case of the US mail schr Merchant, last year, that the oil, though belonging to government, was as much subject to a lien of the wreckers, and to sale in default of payment of salvage, as the property of an individual. Two months were allowed for the payment of salvage—if not paid at that time it is to be taken by the wreckers at the appraised value.

CRAND BAL DE SARACCO—UNDER THE MANAGE—
Of ment of a committee of his friends, at Niblo's Saloon, on Thursday evening, February 3d. This ball will be the most fashionable and recherche of the season. The new and elegant dances have been selected, and the most celebrated musicians engaged. Ticksts of admission exclusively for the ball, or with privilege of twelve or twenty lessons, and a circular containing full particulars, can be procured at Mr. Saracco's, No. 110 Grand street, four doors west of Broadway, by making immediate application, as the number of tickets is limited. It is scarcely necessary to allude to Mr. Saracco's professional shilitles; the superiority of his talents and the rapid progress of his pupils are admitted. Adults who have never danced before are taught all the modern dances in a single course of twelve lessons, and, during this arrangement, they can be obtained at one-third the usual terms. The dances taught will include the Polka, Schottisch, Polka Redowa, Redowa Waltz, Mazourka, Esmerakla, Cinq-temps Waltz, German Cotillons, &c., &c. THE BALL SEASON.
